Assistant Principal (FE College)

Andre has proved to be a reliable and efficient source of advice on a broad range of health and safety topics. He has assisted with premise inspections, advised on policies and procedures, integrating these within the existing College's health and safety management system.

Andre has become a welcome addition to the health and safety team. He has a calm and pleasant manner, enthusing others to the tasks of promoting health and safety in practical and manageable ways. I have no hesitation in recommending his services to others.

County Council Services Manager

Acer's involvement in the inspection programme over the past 3 years has assisted in progressively improving safety on the above sites. Their pro-active relationship with the site teams has developed with Acer encouraging the commitment to H&S improvements. The site reports provide a platform for the identification of local hazards and common hazards enabling the effective allocation of responsibilities and resources allowing the sites to operate safely and efficiently for all who work there and visit them.

Acer provides training to the site teams that has been developed specifically to meet their needs. The training is delivered with enthusiasm and is well received by all those who attend.

When required, Acer has delivered specific reports for new sites and the evaluation of current working practices bringing together information, collated monitoring data and provided action plans. This has enabled us to identify responsibility, and ensure suitable controls are developed.

Acer has provided a wide range of services, and have reacted in a prompt, effective and confidential manner. They offer practical & sensible solutions which are sympathetic to the issues we have particularly when dealing with the Public and Contractors.

Acer are without doubt dedicated to improving our service and are always enthusiastic and positive. I would highly recommend their services and training to others.

Local Council H&S Manager

Following the Asbestos Awareness sessions delivered by Acer Safety Services, I would like to pass on my thanks for your excellent training course. Feedback from the candidates was very positive, at all 3 sessions.

Bury St Edmunds Council recognised the need to provide this training for employees and to raise awareness with the Council's term contractors. The training met our objectives by raising awareness and giving a clear understanding of our local procedures. The course content provided relevant information for candidates with varying degrees of understanding it also considered information for project planners and buildings supervisors who control the activities of our building services contractors.

The use of a wide range of graphical presentation, video and practical examples offered our delegates a clear understanding of how to manage asbestos in our buildings
