

Acer Safety Services Information Sheet 1 Training Services

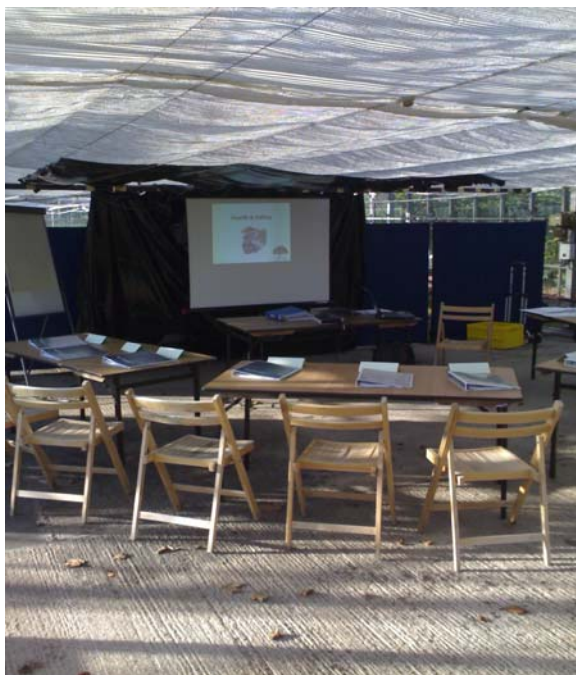

Acer Safety provides on site health and safety for a wide range of organisations. Training is carried out generally at our clients premises. Venues vary from workshops to council chambers, (even greenhouses)!

Training is an essential ingredient of ensuring the competence of your employees and Acer aim to provide that training in a cost effective and efficient manner.

Business Seminar

Our training includes a wide use of different training styles and approaches and recognises the need to understand peoples different learning styles.

Training on risk assessment, on site in clients nursery greenhouse

Our Trainers

Our trainers are all proficient and have a great deal of experience in the practical application of health and safety. Our presentations use a wide range of training styles from graphical presentation, learning exercises and use of video/dvd and CCTV systems.

A much more formal setting within a council chamber.

Acer offers training customised to meet your businesses requirements, whilst we offer a portfolio of training, our speciality is in delivering courses tailored to meet your needs.

Costs

To ensure you get the very best value for money Acer Safety generally charges by the course, not per delegate. This is an extremely cost effective method ensuring good attendance.

Information

Please contact us if you would like to discuss your training needs. Further information on our portfolio and a training guide are also available for you reference.
